ANNEXURE-VII

The criteria of Normalization

The Telangana Public Service Commission (TGPSC) has been using Computer Based Recruitment Test (CBRT) for various recruitments from 2017 onwards. The CBRT involves the Normalization of the Scores of candidates for the Examinations, which are conducted in Multi-sessions. Further, the process of normalization as adopted by major leading organizations at National and State level in the conduct of Recruitment Examinations and Entrance Examinations is also adopted by the Commission.

The Commission has adopted the following formula to calculate final score of candidates in the multi-session CBRT Examinations as recommended by the Experts' Committee constituted by the Commission.

NORMALIZATION FORMULA

$$\widehat{M}_{ij} = \frac{\bar{M}_t^g - M_q^g}{\bar{M}_{ti} - M_{iq}} \left(M_{ij} - M_{iq}\right) + M_q^{gm}$$

Where:

$\widehat{M}_{ij}$ = Normalized marks of jth candidate in the ith shift.

$\bar{M}_t^g$= is the average marks of the top 0.1% of the candidates considering all shifts (number of candidates will be rounded-up).

M_q^g= is the sum of mean and standard deviation marks of the candidates in the examination considering all shifts.

$\bar{M}_{ti}$= is the average marks of the top 0.1% of the candidates in the ith shift (number of candidates will be rounded-up).

M_{iq}= is the sum of mean marks and standard deviation of the ith shift.

M_{ij}= is the actual marks obtained by the jth candidate in ith shift.

M_q^{gm}= is the sum of mean marks of candidates in the shift having maximum mean and standard deviation of marks of candidates in the examination considering all shifts.

N.B. 1. Calculation of normalized marks will be done up to 5 decimal places.

2. Normalized marks of the candidate may vary from the original/absolute marks obtained.

3. Normalized marks of the candidate only shall be taken for General Ranking List (GRL) preparation
